

COSTAR REPEL SP

Solvent-Free Water Repellent and Protector on Porous Surfaces

Description

Costar Repel SP protects the surface against rainwater penetration without changing the aesthetic appearance of the substrate. It is solvent free and water repelling. It is suitable for use on all types of masonry including concrete, brick and stone surfaces that are both absorbent and dry to ensure an effective, protective layer against penetration of rainwater.

Features

- It can be exposed to Ultraviolet Light
- It is water repelling and protects the surface against penetration of rain water without changing the aesthetic appearance

Application Areas

It is suitable for use on all types of masonry including concrete brick, render and stone surfaces

Surface Preparation

Surface should be sound, clean and free of dust, oil, grease and curing compound. Loosely adhered particles such as rust scale, cement smears should be thoroughly cleaned with a wire brush or another such implement. Concrete all new concrete surfaces must be fully cured (6-8 weeks) with a semi-rough surface appearance. Rendered surfaces must be allowed to cure for a minimum of 7 days prior to the application of Costar Repel SP

Application

Costar Repel SP can be applied by brush, roller or low pressure spray. Apply the product until there is no absorption. On very absorbent surfaces, wet on wet application of repeated coat is recommended. Application of Costar Repel Sp on non-porous surfaces is not recommended

Technical Specification
